INSTALLATION PROCEDURE FOR FRP MANHOLE COVERS

Care Should be taken in handling of manhole covers and frames to prevent damage of edges and corners.

Installation Instruction

1. Make sure that top level of the frame should match the road.
2. Prepare concrete bed considering height of the frame.
3. Frame should be allowed to set in concrete for a minimum time of 48 hrs. before its use.
4. Please note frame is not load bearing and therefore has to be completely supported from all sides.

PRODUCT APPLICATION

ELD 2.5T/A15

Suitable for use within residential and institutional complexes with pedestrian but occasional light motor vehicle traffic. These covers are also used for inspection chambers.

LD 5.0T

Suitable for use in areas with continuous motor vehicles traffic e.g. Underground parking or parking decks in residential areas, shopping malls, commercial complexes, high rise buildings, multi floored parking's, etc.

MD10T/B125

Suitable for use in service lanes and roads, on pavements, for use under medium duty vehicular traffic including car parking areas.

HD20T/C250

Suitable for use in institutional areas, commercial areas, carriage ways, city trunk roads, bus terminals etc. with heavy duty vehicular traffic of wheel loads between 5-10 tonnes, like buses and trucks and parking areas where manhole chambers are located in between the middle of roads.

These covers can also be used for:

- Inspection chambers for sewerage.
- Underground electrical and telecom cable chambers.
- Water, Gas and Petroleum installations.
- Beautification of gardens and landscapes.
